#### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/25/2005 has been entered.

## Claim Objections

2. Claims 39-41 are objected to because of the following informalities: The applicant point outs that the copy start device is the control panel of MFC1 or the PC50, and the copy start step is when the PC copy mode is designated by the operator. It is clear that the control panel or the PC 50 does not copy. PC 50 or the control panel starts the copy process of the system as a whole which includes the reading step, the conversion step, the first transmission step, the storing step, the second transmission step and the reception printing step. The way the claim is written appears that PC50 or the control panel is performing the copy process which includes the reading step, the conversion step, the first transmission step, the storing step, the second transmission step and the reception printing step.

The "...the storing sep the second transmission step..." of claim 41 appears to be missing a punctuation "comma" in between the two steps.

Appropriate correction is required.

Art Unit: 2624

## Allowable Subject Matter

3. Claims 1-23 are allowed.

Claims 1-23 are allowed because of the persuasive argument presented by the applicant on page 15, page 16 of the amendment filed on 5/25/2005.

#### Conclusion
